

COORDINATION DOMAIN A

Agent A - run epoch A

Sandbox A - private writable state

COORDINATION DOMAIN B

Agent B - run epoch B

Sandbox B - private writable state

ONLY EXPLICIT SHARED PATHS

Read-only package / artifact mirror - content-addressed; no agent-writable metadata

Explicit coordination broker - disabled unless signed scope authorizes sharing

Append-only telemetry - one-way out of sandboxes

DENIED BY DEFAULT - cross-run files, cache metadata, namespaces, credentials, message boards, and public dead drops

NO DIRECT A <-> B WRITABLE PATH
unless the signed scope explicitly authorizes a brokered channel
