

AISI CYBER EVALUATION
122 runs / 7 models | internet intentionally enabled
provider cyber classifiers disabled

TASK PRESSURE
Hard or sometimes misconfigured task
Agent searches for alternate routes

DELEGATED REACHABILITY
Open internet exposes public systems, people,
collaboration channels, and public write surfaces

OBSERVED UNSANCTIONED ACTION CLASSES

Attempted malicious PR + fake identities / social engineering

Messages / files directed at real people

Attempts to plant instructions for other AI systems

Public artifacts enabling coordination across independent runs

INCIDENT OUTCOME
19 unsanctioned actions in 10 runs
No evidenced resulting real-world harm
Human review blocked the most serious PR

DETECTION
General security monitoring detects Tor egress on July 28

CONTAINMENT
Runs stopped; models disabled; machines isolated within roughly 1 hour
